

ECE 486 / 687 Robot Dynamics & Control
Spring 2026

Instructor | Dr. Gennaro Notomista
Email: gennaro.notomista@uwaterloo.ca
Office: E5 4006

Lab instructor | Dr. Mike Cooper-Stachowsky
Email: mstachowsky@uwaterloo.ca
Office: E2 3350A

Teaching assistants | Samuel Street ssstreet@uwaterloo.ca
Pi Thanacha Choopojcharoen tchoopoj@uwaterloo.ca

Time and place	Lectures	Wednesday, Thursday	14:30–15:50	PSE 4043
	Tutorials	Tuesday	20:00–20:50	PSE 4433
	Office hours	Tuesday	11:30–13:30	E5 4006

Description

This course will introduce students to dynamic modeling and control techniques for robotic systems, and expose them to some cutting-edge research. The course will be divided into five modules, corresponding to the following topics:

1. Dynamics of manipulators
2. Control of manipulators
3. Kinematics of mobile robots
4. Control of mobile robots
5. Optimization-based robot control

Each module will be presented during lectures supported by interactive demonstrations with the Franka Emika manipulator robot (<https://www.franka.de/research>) in the RoboHub. The concepts will be reinforced through homeworks containing both theoretical exercises and programming assignments (Python or MATLAB). The course will also include a lab section (for undergraduate students only) and a project which will allow students to implement robot control algorithms on a table-top robotic arm and the mobile manipulator DJI RoboMaster EP (<https://www.dji.com/ca/robomaster-ep>), respectively.

Prerequisites

- ECE 380 for ECE 486

- No formal prerequisites for ECE 687

Prior knowledge of linear algebra, rigid body dynamics, feedback control systems, and mathematical optimization can make life a bit easier.

Reading

The course textbook is:

- [1] Mark Spong, Seth Hutchinson, and Mathukumalli Vidyasagar, *Robot modeling and control*, John Wiley & Sons, 2020

The following texts will be used for parts of the course:

- [2] Bruno Siciliano, Lorenzo Sciavicco, Luigi Villani, and Giuseppe Oriolo, *Robotics. Modelling, planning and control*, Springer, 2009
- [3] Stephen Boyd and Lieven Vandenberghe, *Convex optimization*, Cambridge University Press, 2004
- [4] Magnus Egerstedt, *Robot Ecology: Constraint-Based Design for Long-Duration Autonomy*, Princeton University Press, 2021

Additional reading material will be provided as appropriate.

Deliverables and grading

ECE 486

- Homeworks (20%)
 - 2 homeworks
 - 10% each
- Lab (25%)
 - Labs 1, 2, 3, 4, 5 are worth 2%, 4%, 5%, 6%, 8%, respectively
- Project (25%)
 - Final project report: 20%
 - Project code: 5%
- Final (30%)

ECE 687

- Homeworks (50%)
 - 2 homeworks
 - 25% each
- Project (50%)
 - Final project report: 40%
 - Project code: 10%

In addition, students (both of ECE 486 and ECE 687) who will submit typeset notes will receive up to an extra 2%.

Lab details

The lab will consist of the visual servoing of a robotic arm. The work will be carried out in groups of at most 2 people (same as the project groups). More details in the lab manual on the course website.

Project details

The project will consist of the control of a mobile manipulator. The work will be carried out in groups of at most 2 people (same as lab groups). More details in the project description on the course website.

Project details: Alternative for MASc and PhD students

The project will consist of the solution to a problem in the student's research area using the techniques covered during the course.

Audit policy

Either the homeworks or the project must be completed to audit the course.

Policy on academic integrity

Academic integrity To maintain a culture of academic integrity, members of the University of Waterloo are expected to promote honesty, trust, fairness, respect and responsibility. A student is expected to know what constitutes academic integrity, to avoid committing academic offences, and to take responsibility for their actions. A student who is unsure whether an action constitutes an offence, or who needs help in learning how to avoid offences (e.g., plagiarism, cheating) or about “rules” for group work/collaboration should seek guidance from course instructor, academic advisor, or Graduate Associate Dean. When misconduct has been found to have occurred, disciplinary penalties will be imposed under Policy 71 - Student Discipline. For information on categories of offenses and types of penalties, students should refer to Policy 71 - Student Discipline, <https://uwaterloo.ca/secretariat/policies-procedures-guidelines/policy-71>.

Grievance A student who believes that a decision affecting some aspect of their University life has been unfair or unreasonable may have grounds for initiating a grievance. Read Policy 70 - Student Petitions and Grievances, Section 4, <https://uwaterloo.ca/secretariat/policies-procedures-guidelines/policy-70>.

Discipline A student is expected to know what constitutes academic integrity (<https://uwaterloo.ca/academic-integrity>) to

avoid committing an academic offence, and to take responsibility for his/her actions. A student who is unsure whether an action constitutes an offence, or who needs help in learning how to avoid offences (e.g., plagiarism, cheating) or about “rules” for group work/collaboration should seek guidance from the course instructor, academic advisor, or the undergraduate Associate Dean.

Appeals A student may appeal the finding and/or penalty in a decision made under Policy 70 - Student Petitions and Grievances (other than regarding a petition) or Policy 71 - Student Discipline if a ground for an appeal can be established. Read Policy 72 - Student Appeals, <https://uwaterloo.ca/secretariat/policies-procedures-guidelines/policy-72>.

Note for students with disabilities The Office for persons with Disabilities (OPD), located in Needles Hall, Room 1132, collaborates with all academic departments to arrange appropriate accommodations for students with disabilities without compromising the academic integrity of the curriculum. If you require academic accommodations to lessen the impact of your disability, please register with the OPD at the beginning of each academic term.

Academic Integrity Office (UW) <https://uwaterloo.ca/academic-integrity/>.

Schedule

Date	Subject	Reading	Deliverable due
DYNAMICS OF MANIPULATORS			
May 13	Introduction to robot dynamics and control		
May 14	Rigid body transformations	2 [1], 2 [2]	
May 20	Rigid body transformations	2 [1], 2 [2]	
May 21	Direct kinematics	4 [1], 3 [2]	
May 27	Differential kinematics	3 [1], 2 [2]	
May 28	Inverse kinematics	5 [1], 3 [2]	
May 29	Makeup lecture, 16:00–17:20, PSE 4043		
CONTROL OF MANIPULATORS			
Jun 3	Dynamic model of manipulators	6 [1], 7 [2]	Lab 1
Jun 4	Decentralized and centralized control	8, 9 [1], 8 [2]	
Jun 5			Project proposal
Jun 10	Operational space control	9 [1], 8 [2]	
Jun 11	Impedance control	9 [1], 8 [2]	
Jun 12			HW 1
KINEMATICS OF MOBILE ROBOTS			
Jun 15	Robohub session, 10:00–12:00, 13:00–15:00		
Jun 17	Kinematic constraints	14 [1], 11 [2]	Lab 2
Jun 18	Kinematic model	14 [1], 11 [2]	
Jun 19	Makeup lecture, 16:00–17:20, PSE 4043		
Jun 22-26	Midterm week — no class		
Jun 22	Robohub session, 10:00–12:00, 13:00–15:00		
CONTROL OF MOBILE ROBOTS			
Jun 29	Robohub session, 10:00–12:00, 13:00–15:00		
Jul 1	Canada day — no class		
Jul 2	Controllability	14 [1], 11 [2]	Lab 3
Jul 6	Robohub session, 10:00–12:00, 13:00–15:00		
Jul 8	Control of driftless systems	14 [1], 11 [2]	

Jul 9	Control of differentially flat systems	14 [1], 11 [2]	
Jul 10	Makeup lecture, 16:00–17:20, PSE 4043		
	OPTIMIZATION-BASED ROBOT CONTROL		
Jul 13	Robohub session, 10:00–12:00, 13:00–15:00		
Jul 15	Recap of mathematical optimization	1 [3], lecture notes	
Jul 16	Constrained convex optimization	4, 5 [3], lecture notes	
Jul 17			HW 2
Jul 20	Robohub session, 10:00–12:00, 13:00–15:00		
Jul 22	Stability and control Lyapunov functions	4 [4], lecture notes	Lab 4
Jul 23	Invariance and control barrier functions	4 [4], lecture notes	
Jul 27	Robohub session, 10:00–12:00, 13:00–15:00		
Jul 29	Combining stability and invariance tasks	4 [4], lecture notes	
Jul 30	Research challenges and opportunities		
Jul 31	Makeup lecture, 16:00–17:20, PSE 4043		
Jul 31	Nonlinearland, 16:00–17:00, PSE 7303/7363		
Aug 5	Robohub session, 10:30–16:30		Lab 5
Aug 6			Project final report
Aug 11	Final exam, 12:30–14:00, room TBA
